

Elidan Fuertes

BSIT Student | Aspiring Data Analyst

General Malvar, Malate, Manila, Philippines | 09662078899 | elsorafuertes@gmail.com | [linkedin.com/in/elidan-fuertes](https://www.linkedin.com/in/elidan-fuertes) | github.com/Elidann | elidigital.netlify.app

Third-year BSIT student building a data analytics track through hands-on Power BI and SQL projects, alongside full-stack development experience in PHP and Laravel. Preparing for an at least 600 hour internship, seeking a Data Analyst or Business Intelligence role to apply these skills in a real business environment.

TECHNICAL SKILLS

- | | | |
|---------------------------|-----------------|---------------------------|
| • Power BI & DAX | • Power Query | • SQL (MySQL, SQL Server) |
| • Python (pandas) | • PHP & Laravel | • JavaScript |
| • HTML/CSS & Tailwind CSS | • Git & GitHub | |

PROJECTS

St. Martin Clinic E-Records and Appointments Management System

Puerto Princesa City, Philippines

Undergraduate Capstone Thesis (In Progress), Holy Trinity University

Aug – Present

Partner capstone building a clinic records, appointment, and analytics platform for HTU's CET students.

- Designing and developing electronic records, appointment, and medicine inventory modules with a thesis partner, to centralize clinic recordkeeping for CET students
- Evaluating the system against seven ISO/IEC 25010 quality characteristics to validate it against formal software engineering standards ahead of thesis defense

Hospital Patient Waiting List Dashboard (Inpatient & Outpatient)

Puerto Princesa City, Philippines

Power BI Dashboard, Independent Project

September 2026

Guided Power BI project analyzing hospital inpatient and outpatient patient waiting list data.

- Consolidating 2018–2021 inpatient and outpatient waitlist extracts (~450,000 records) with a specialty-mapping table into a single unified dataset ready for modeling
- Building DAX measures for latest-month and prior-year waitlist comparisons, plus a summary-to-detail dashboard with KPI cards, trend lines, and a drill-down pivot table

Nashville Housing Data Analysis

Puerto Princesa City, Philippines

Power BI Dashboard, Independent Project

September 2026

Self-directed project cleaning and modeling a public housing dataset into a Power BI dashboard.

- Cleaning a raw housing dataset in Power Query, resolving missing addresses through self-join merges and standardizing fields, to produce an analysis-ready dataset
- Building four DAX measures and dashboard visuals, including total and average sale value and vacant sales percentage, to surface sales trends and property status

SmileCare: Dental Clinic Appointment System

Puerto Princesa City, Philippines

PHP/MySQL Course Project, Holy Trinity University

June 2026

Course project building a role-based dental clinic appointment and payment-verification system.

- Developing a role-based appointment booking system using PHP and MySQLi for three user types (Guest, Patient, Admin), to give each user group a workflow scoped to their needs
- Designing the underlying database schema and MySQLi queries powering appointment scheduling, patient records, and admin oversight, to support the system's three-role access model

EDUCATION

Holy Trinity University

Puerto Princesa City, Palawan, Philippines

Bachelor of Science in Information Technology
